**Footnotes:**

<sup>1</sup>ONC uses the Centers for Medicare and Medicaid Services (CMS) Provider of Services (POS) file (as of March 2015) to calculate the number of hospitals in each state. These hospital calculations only include active (not closed, etc.) short term general, critical access, and children's hospitals, and exclude non-acute care facilities. These numbers represent all hospitals eligible to participate in the CMS EHR Incentive Programs. <sup>2</sup>Small rural hospitals are facilities in non-metropolitan areas with fewer than 100 staffed beds. Critical access hospitals are facilities in non-metropolitan areas with fewer than 25 staffed beds. **For more information, visit [www.dashboard.healthit.gov/datadashboard/data.php](http://www.dashboard.healthit.gov/datadashboard/data.php) or contact [ONC.Request@hhs.gov](mailto:ONC.Request@hhs.gov).**
