The health information technology (health IT) adoption and utilization data presented below are based upon measures developed and/or reported publicly by the HHS ONC within the Health IT Dashboard, at http://dashboard.healthIT.gov.

The Health IT Dashboard presents key information about ONC programs and research data to enable collaborative monitoring of the impact of federal policies, programs, and research activities related to health IT.

Health IT, including the adoption of electronic health records, health information exchange, and other personalized medical devices has the power to transform health care delivery and contribute to improvements in quality and costs. This report monitors health IT measures in the following areas:

- Estimates of the Number of Health Care Providers
- Office-Based Health Care Provider Adoption of EHRs and Health Information Exchange Capability
- Acute-Care Hospital Adoption of EHRs and Health Information Exchange Capability
- Electronic Prescribing Capability Among Health Care Providers and Pharmacies
- Summary of ONC HITECH Programs and Recovery Act Funding
- Community College Consortia to Educate Health IT Professionals Program
- Health IT Regional Extension Centers Program
- Centers for Medicare & Medicaid Services, Medicare and Medicaid EHR Incentive Programs

#### Notes:

1. EHR Incentive Program snapshot data does not include Medicare Advantage Organizations for Eligible Professionals.
2. Denominator equals the total number of health care professionals (both eligible and ineligible for the EHR Incentive Programs), as listed on Page 1 ‘Provider Population Estimates’.
3. Denominator includes only active U.S. short term general, critical access, and children’s hospitals.
